Summary Report

ADC-1803: Early Clinical Exposure

Early Clinical Exposure (ECE) refers to the intentional integration of clinical experiences into the early stages of medical education, typically during the preclinical years of medical school. It involves providing medical students with opportunities to interact with patients, observe clinical settings, and participate in healthcare activities from the outset of their medical training. The ECE course aims to bridge the gap between theoretical learning and clinical practice by immersing students in real-world healthcare environments early in their education. It also gives students a deeper understanding of Medical subjects and its application and makes them familiar about the history taking, physical examination and patient communication at the early stage to enhance their clinical competency. The Course also cultivates professional, professionalism, empathy, and ethical awareness by exposing students to patient interactions and healthcare settings, instilling a sense of responsibility and respect for patient dignity. Dr Himabindu, Professor, Department of Microbiology, MRIMS who have undergone training in ECE for medical graduates under CBME and has good knowledge about ECE and have experience about training medical graduates in patient communication, history taking and she was supported by two excellent MEU members Dr Naveen, Professor, Department of Anatomy, MRIMS and Dr Rohit, assistant Professor, Department of Pharmacology, MRIMS who have good knowledge and skills on ECE.

The Program was conducted on at 18.2.2019 to 22.2.2019 Lecture Hall, Ground Floor, Academic Block, MRIMS, Hyderabad for 115 students of III MBBS(2016 Batch) for 30 hours
