Summary Report

ADC-1904:Program on Research Methodology

Research methodology provides a framework to research scientists to find out the needs of research, define research question, hypotheses and develop objectives. It also helps researchers identify the most appropriate research design, sampling technique, and data collection and analysis methods. And as research is inevitable for every doctor this course was designed to provide an insight into the process of research.

Research is a key component of the department of Community Medicine and hence to take this course, we had with us Dr. Prashant Kokiwar, Professor and HOD of the department who has years of experience in this field and was instrumental in developing the MRIMS journal and knows this process in and out. To aid him in this course, we had Dr. Sushma, Professor in the department who apart from her subject knowledge is a very passionate teacher. They were accompanied by Dr. Ramesh, the statistician who was very valuable to this course.

The program was conducted on 16.12.2019- 20.12.2019 at Lecture Hall, Ground Floor, Academic Block, MRIMS for 67, I Post Graduates (2019 batch)
