Summary Report

ADC-2003: Palliative Care-Dealing with the Pain

Palliative care is an approach that improves the quality of life of patients and their families facing the problem associated with life-threatening illness, through the prevention and relief of suffering by means of early identification and impeccable assessment and treatment of pain and other problems, physical, psychosocial and spiritual. It focuses on providing Quality of care for terminally ill patients. It provides patient satisfaction reduces depression and anxiety. Caring for someone at the end of their life can be distressing. Offer support to the dying person's family, careers and others important to them. This course is framed in such a way to make our students to understand the main concept of Empathy and giving supportive care. The course will help them to learn skills in the assessment and management of patients with advanced cancer as well as patients facing terminal illness from other diseases (e.g. organ failure, dialysis discontinuation) in a variety of care settings and they can apply the multidimensional skills of high-quality palliative care practice to the specific scenario of caring for dying patient and their family. The key resource person for this course was Dr Prashant Kokiwar, Professor & HOD, Department of Community Medicine MRIMS who has trained many interns and students in palliative care services and has good experience in palliative care and he was supported by two faculty who have excellent knowledge and field experience in palliative care, Dr Arun Kiran Soodi Reddy, Assistant Professor, Department of Community Medicine MRIMS and Dr Sushma Katkuri Professor, Department of Community Medicine MRIMS

The program was conducted from 19th October 2020 to 23rd October 2020 to a total of 50 medical students who were enrolled into the course
