Summary Report

ADC-1805: Universal Precautions

Universal precautions are a standard set of guidelines to prevent the transmission of bloodborne pathogens from exposure to blood and other potentially infectious materials (OPIM). Universal precautions are safety precautions used with every client. Since you cannot identify every client who may transmit infection, you must treat all human body fluids as if there were known to be infectious. Handwashing is the single most effective means of preventing the transfer of infection. The course is designed in such a way students will learn, the importance of Universal Precautions to be followed in work place, they will use personal protective measures and follow standard guidelines while handling patient, fluids, linen etc. They were briefed on respiratory etiquette. All the sessions will be taken by all faculty who have vast knowledge and experience in this field and who has guided and trained several students. The key speaker was Dr Sanjeev Rao, Prof & HOD, Department of Microbiology, MRIMS who has experience of more than 15 years and he is supported by Dr Rahman, Professor, Department of Microbiology, MRIMS and Dr Himabindu, Professor, Department of Microbiology, MRIMS who are having excellent knowledge in the universal precautions guidelines.

The Program was conducted on 13.5.19 to 17.5.19 at Lecture Hall, Ground Floor, Academic Block, MRIMS, Hyderabad for 110 Interns participated (2013 Batch) for 30 hours.
