# We are looking forward to your participation

Cardiovascular diseases remain the leading cause of mortality worldwide, necessitating on-going research & development in the field of cardiovascular pharmacology & cardiac health. Recent advances include use of appropriate pharmacological adjuvants during cardiac procedures, meticulous prescription for cardiac patients, as well as repurposing of drugs for specific conditions. While the application of biologics in cardiology is still evolving, biosimilars have the potential to improve patient access and affordability of these therapies.

Dear delegates,

We are delighted to invite you to this CPD on Cardiovascular Pharmacology hosted by the Department of Pharmacology, MRIMS. This CPD aims to bring together academicians, researchers, clinicians to update knowledge, new perspectives and exchange ideas in cardiovascular pharmacology. So we welcome all faculty, PGs, senior residents, tutors to this inclusive CPD program and enhance your knowledge.
