The CPD on "Prevention to Palliation: Closing the Loop in Cancer Care" focuses on the entire cancer care continuum, emphasizing the critical roles of screening, cancer registries, and the patient journey. It aims to enhance early detection through evidence-based screening protocols, promote the use of cancer registries for data-driven care and policy-making, and explore the physical, emotional, and social aspects of a patient's experience from diagnosis to end-of-life care. The program fosters multidisciplinary collaboration to ensure timely, personalized, and compassionate care, ultimately aiming to improve outcomes and quality of life for individuals affected by cancer.
