**Dear Colleagues,**

Attending this Continuing Professional Development (CPD) program on Stroke is essential for physicians and postgraduate trainees committed to advancing their clinical competence in one of the **highest impact areas of medicine. Stroke is the third leading cause of death worldwide and contributes** to a substantial global burden, with nearly 94 million people currently living with its effects. This session offers attendees to an in-depth understanding of underlying neurovascular physiology along with diagnostic evaluation, and evidence-based management strategies. This integrated approach bridges foundational scientific principles with practical bedside application, enabling physicians and postgraduate trainees to achieve greater diagnostic precision, optimize therapeutic timing, and enhance decision-making in acute stroke care. The program delivers focused, high-yield content through expert presentations and relevant case discussions. This CPD empowers doctors and postgraduates to enhance their management of stroke and reduce associated morbidity and mortality.
